

Review and update of the RII emergency response qualifications - Summary of Changes

Key to mapping tables

E	Equivalent	Where the workplace outcomes of the superseded and superseding training package components are equivalent.
NA	Not applicable	Where mapping information is not applicable. Minor updates do not require an equivalence determination.
NE	Not equivalent	Where a training package component is superseded, and the workplace outcome of the component has changed.
NC	Newly created	Where the training package component has been created to address an emerging skill or task required by industry.
D	Deleted	Where a training package component is deleted as the skill or task is no longer required by industry.

**To note:** The training product codes ending in X or XX have been assigned for the purposes of consultation and throughout the consultation log. Training product codes for publication will be assigned in the final version training products, noted in the mapping document and updated on the National Training Register after endorsement.
