

AURJTJX02 Remove, inspect, repair and refit motorcycle tyres

AURJTJX02 Remove, inspect, repair and refit motorcycle tyres

Modification History

Release	Comment
Release 2	Updates to Application and removal of reference to tyre tubes
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to remove tyres and tubes from motorcycle wheels, inspect the tyre and wheel to assess serviceability, carry out tyre and tube repairs, and reassemble the wheel assembly. It involves identifying and confirming work requirements, preparing for the work, inspecting, repairing and refitting motorcycle tyres and tubes, and completing workplace processes and documentation.

It applies to those working in the motorcycle service and repair industry. This unit does not apply to agricultural machinery, heavy commercial vehicles, marine vessels or mobile plant machinery.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Mechanical - Motorcycle

Unit Sector

Technical - Wheels and Tyres

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to remove, repair and refit	1.1 Job requirements are determined from workplace instructions

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
motorcycle tyres	1.2 Tyre removal, inspection, repair and refitting information is sourced and interpreted 1.3 Hazards associated with the work are identified and risks are managed 1.4 Tools, equipment and materials are selected and checked for serviceability
2. Remove and inspect tyres and wheels	2.1 Tyres are removed from wheels according to manufacturer specifications, workplace procedures, and <i>safety and environmental requirements</i> 2.2 Tyres and wheels are inspected according to manufacturer specifications and workplace procedures 2.3 Inspection findings and recommendations for necessary repairs are reported according to workplace procedures
3. Repair and refit tyres	3.1 Repair options are analysed and those most appropriate to the circumstances are selected 3.2 Tyres are repaired according to manufacturer specifications and workplace procedures 3.3 Tyre is mounted to wheel according to manufacturer specifications and workplace procedures, and without causing damage to components or systems 3.4 Assembled wheel and tyre are checked for serviceability and correct assembly, and wheel assembly is inflated according to manufacturer specifications and workplace procedures
4. Complete work processes	4.1 Final inspection is made to ensure work is to workplace expectations and wheel assembly is presented ready for use 4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected 4.3 Tools and equipment are checked and stored according to workplace procedures 4.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> locate tyre repair information efficiently.
Reading skills to:	<ul style="list-style-type: none"> interpret information in manufacturer specifications and workshop literature when seeking tyre repair procedures and specifications.
Writing skills to:	<ul style="list-style-type: none"> legibly and accurately fill out workplace documentation, making recommendations and recording material used.
Numeracy skills to:	<ul style="list-style-type: none"> interpret numerical information in: <ul style="list-style-type: none"> manufacturer specifications wheel and rim assemblies tyres workplace instructions tyre inflation gauges understand numerical divisions in metric and imperial units of measurement.
Technology skills to:	<ul style="list-style-type: none"> operate tyre changing tools and equipment operate tyre repair equipment.

Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Safety and environmental requirements</i> must include:	<ul style="list-style-type: none"> work health and safety (WHS) and occupational health and safety (OHS) requirements, including procedures for: <ul style="list-style-type: none"> deflating and inflating motorcycle tyres manually handling motorcycle wheel assemblies environmental requirements, including procedures for trapping and disposing of tyre material produced during repair procedures.

DRAFT

Assessment Requirements for AURJTJX02 Remove, inspect, repair and refit motorcycle tyres

Modification History

Release	Comment
Release 2	Updates to Application and removal of reference to tyre tubes
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- remove, inspect, repair and refit each of the following motorcycle tyres:
 - road radial tyre
 - road bias tyre
 - cross-ply tyre
 -

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- methods to locate and interpret information required to remove, inspect and refit motorcycle tyres, including:
 - manufacturer specifications and procedures
 - tyre placards and markings
 - workplace procedures
- workplace procedures required to remove, inspect, repair and re-fit motorcycle tyres and including:
 - establishing serviceability of tools and equipment
 - documentation procedures
 - housekeeping procedures including:
 - examination of tools and equipment
 - storage of equipment
 - identification, tagging and isolation of faulty equipment

- disposal of excess materials
 - recycling procedures
- workplace health and safety (WHS) requirements, including statutory regulations, codes and standards, relating to removing, inspecting, repairing and refitting motorcycle tyres, including procedures for:
 - deflating and inflating motorcycle tyres
 - gauge pressure
 - overinflation and underinflation
 - managing risks associated with working with stored energy, including
 - air pressure
 - mechanical release of stored energy
 - projectiles, flying debris or components
 - explosions, blasts and ruptures
 - the force of explosions and blasts
 - the tyre blowing off the rim
 - explosion of the assembly
 - noise
 - manually handling motorcycle wheel assemblies
 - using wheel assembly removal tools
- environmental requirements, including procedures for trapping and disposing of tyre material produced during repair procedures
- types and applications of different types of tyres, tubes and wheels, including:
 - road radial
 - road bias
 - cross-ply
 - off road
 - race
 - spoke rims
- types, application and function of tyre changing equipment and tyre and tube repair equipment
- procedures for deflating, dismantling and inspecting wheel assemblies, including:
 - rim locks
 - spoke rims
 - one piece wheels
- procedures for repairing tyres and tubes
- identifying tyre pressure monitoring systems
- procedures for reassembling and inflating wheel assemblies, including:
 - rim locks
 - spoke rims
 - one-piece wheels
 - post-assembly checks of wheel assemblies.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the motorcycle tyres and tubes that they have worked on, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- motorcycle repair workplace or simulated workplace
- workplace instructions
- manufacturer tyre and tube repair procedures and specifications
- motorcycle tyres and wheel assemblies specified in the performance evidence
- tools, equipment and materials appropriate for removing, inspecting, repairing and refitting motorcycle tyres and tubes, including:
 - tyre and tube repair tools and equipment
 - tyre and tube repair patches and plugs
 - tyre changing tools and equipment.
